Subject: Water Rights

To whom it may Concern,

I am a property owner in Desert Springs, AZ and also live in the Las Vegas Valley. Our property currently has water rights and an existing well. It seems that if the sale of water across state lines proceeds, then it logically translates into our well and others in the area, running dry. I am not in favor of the sale of the water to Nevada from Arizona, it would cause major hardships for our development and the future well being of the community. I hereby request that all actions to move the water across state lines be denied.

Thank you,

Larry Monkarsh
