Subject: Wind River Resources Application

I am a resident of Scenic, Arizona and I am extremely concerned about the proposed application to take Arizona water out of the state and mix it with contaminated water from Nevada. It is my understanding that the application states that some of the water may be returned to a PORTION of scenic. No plan is being considered to supply water to all of the Arizona people who already live here, nor the future residents of the area. Also, the representatives of Mohave County have explained in the meeting they held in this area, that funds are not available to conduct studies as to the amount of water that is recuperated on an annual basis. At the present time our home, and many others are serviced with private wells which the homeowners have invested approximately \$15,000.00 and at this point in time no evidence has been shown that these wells, which are not as deep as the proposed application wells will remain in operation. Therefore, with the possibility of the private wells being rendered useless, and no plan to provide any water commercially or publicly, The home owners in this area will have no way to maintain our homes and investments.

I earnestly seek your decision to stop this application on these grounds as well as other issues which are in question since the granting of such would, in my opinion, be extremely detrimental to Arizona. It could set a precedent for other states and individuals to sell water which we need to others, therefore affecting not only this area, but the entire state of Arizona.

I thank you for your time.

Respectfully,
Dorothy Wilcox
